OUTLOOK:

Weather Discussion: High pressure will continue to control the weather of the western states, with temperatures staying above normal through Thursday. Flow around the high pressure system over the Great Basin will continue to pump moisture into the Sierras today. This moisture should spark thunderstorms along the spine of the eastern California Mountains. Some of these storms may enter southern Oregon during the evening.

 - Terrain influences
 - Fuel type and conditions
 - Fire weather (previous, current, and expected)
 - Fire behavior (previous, current, and expected)
- Mission/Execution:
 - Command (Incident Commander/immediate supervisor)
 - Commander's intent
 - Specific tactical assignments
 - Contingency plans
- Communications:
 - Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
 - Medevac Plan
- Service/Support:
 - Other resources that may be working adjacent to you and those available to order
